## Hollywood Southern Regional Wastewater Treatment Plant Ocean Outfall

**Client/Owner:** City of Hollywood

**Project Location:** Hollywood, Florida

Work consisted of repair and cover of selected underwater sections of the Hollywood Southern Regional Wastewater Treatment Plant Ocean Outfall with an articulated concrete mat system and the transplantation of certain stony coral colonies. Work plan included successfully working through environmentally sensitive areas including coral. Work was performed ensuring continued operation and performance of the existing wastewater facilities.

Additional work was awarded based on our ability to complete additional work ahead of the original substantial completion date.
