

# Town of Bethlehem Comprehensive Plan

**Client/Owner:** Saratoga Associates / Town of Bethlehem

**Project Location:** Delmar, NY

Greenman-Pedersen, Inc was part of the planning team preparing an update to the Town of Bethlehem Comprehensive Plan. GPI 's role was to develop the transportation element, which is directly related to the type and intensity of future development in the town.

GPI reviewed the existing state and local highway network in the town, including roadway characteristics; intersection layout and signalization; existing traffic data, capacity and level-of-service of major routes; obtained previous state and local transportation studies and assessed their proposals; and described transit and park-and-ride services in the town. GPI made recommendations for locations for specific transportation and land use corridor studies; standards for safe bicycle and pedestrian use; and utilizing Town Official Map powers to preserve rights-of-way.
