

Kingston-Rhinecliff Bridge

Client/Owner: NYS Bridge Authority
Project Location: Highland, NY

Construction Support Services for Deck Replacement project.

GPI acted as a liaison Engineer between the Bridge Owner and the Contractor, (New York State Bridge Authority, CIANBRO Construction Corporation).

The design support services during construction encompassed the following items:

- Review Contractor submittals and shop drawings.
- Review of the Contractor's work schedule.
- Liaison with the Bridge Authority assigned inspection staff, including necessary field visits, answering technical questions and interpreting the contract documents.
- Evaluation of changes in field conditions from the contract documents, and recommendations for action.
- Perform Value Engineering review of Contractor submittals.
- Development of as-built drawings.
- Participation in final inspection.
