Debris Removal/Hurricane Restoration

**Client/Owner:** City of Palm Bay

**Project Location:** Turkey Creek

UESI was contracted to clear submerged and above water hazards created by two hurricanes from Turkey Creek in a Florida Sanctuary. The debris consisted of mainly trees and bushes. The contract required a quick start time after issuing of a purchase order and working through weekends to complete the project prior to a set completion date. UESI crews completed the job safely, ahead of schedule and under budget estimate.
