

Term Agreements for VAOT

Gorman River Bridge

Maidstone Bridge Containment

Fair Haven Paving

Stamping Asphalt in Wallingford

Subbase application in Winhall

Client/Owner: Vermont Agency of Transportation
Project Location: Statewide

Since 1996, served successive term agreements providing construction engineering and inspection services on a variety of transportation projects throughout Vermont.

These projects generally involved the paving of highways, major realignment of highways, new bridges, rehabilitation of bridges, (including traditional bridges, covered bridges, and historic bridges), intersection revisions, airport runway construction, airport approach lighting systems, railroad crossing reconstruction and specialty services. The specialty services include bridge paint removal, painting and coatings evaluation (Hartford, Barnet, Burlington, Bennington, Manchester and North Hero), claims development and resolution (Rutland Multimodal Center); project design reviews (Rutland); bridge condition inspection (Missisquoi Bay); and design plan review for staging, Maintenance & Protection of Traffic, and constructability.
