

## Wireless Communications

**Client/Owner:** Sprint/Nextel, AT&T, Bechtel, Bell Atlantic/Verizon, Crown Atlantic, SBA Towers, General Dynamics

**Project Locations:** Various Locations, NJ, NY, PA, DE

These companies has been actively pursuing the expansion and improvement of its wireless coverage for its costumers in the tri-state area. GPI has assisted in meeting their goals by designing and developing over 400 wireless communications sites in this region over the past 13 years. These projects involve the construction of new and the expansion of existing wireless communications sites. These sites are a mixture of monopole, lattice tower, rooftop and the collocation on existing tower structures. All projects require close coordination with the property owner, client, and the local authorities to provide the most practical, cost-effective and aesthetically pleasing location for the installation of all required equipment.

GPI provides the client with any assistance required to obtain the Local, State and Federal approvals and permits required for each specific project. The scope of work includes Lease Exhibits, survey, Phase I, NEPA/SHPO, Zoning Drawings, professional testimony, geotechnical analysis, utility coordination and design, Construction Documents, component design review, construction and DEP permitting, construction inspection, and NYC D-14 Inspections. Our project design team possesses a broad base of knowledge and experience, a dedication to quality, and a positive "can do" attitude. These factors allow us to be responsive to the ever-changing needs of our client in the rapidly developing and fast paced industry of wireless communications.
