

Peconic River Fish Ladder

GPI

Environmental Sciences & Permitting

Owner: New York State Office of General Services
Project Location: Calverton, NY

New York State Office of General Services has proposed the rebuilding of several dams along the Peconic River in Riverhead/Calverton, NY. One stipulation made by the NYSDEC is that these dams shall not impede the progression of Atlantic Shad or American Eels upstream. GPI is providing assistance in the design of two types of fish ladders to allow this upstream migration. The design will feature one Rock Ramp Fish Ladder and one Eel Ladder.
