Tampa Bay Water Selects ACA for Multi-Year Aerial Contract

Aerial Cartographics of America (ACA), Orlando Florida, completes 2009 flights and is presently working on the spring flight as part of a 1600 square mile three year contract with Tampa Bay Water.

ACA was selected after demonstrating improved clarity and resolution of false color infrared imagery (CIR) taken from its Vexcel UCX Digital Mapping Large Format Camera. The approximately 1600 square miles of imagery, flown twice a year, is used to compare and analyze changes in wetland vegetation and hydrological surface conditions in the area for which Tampa Bay Water delivers high quality drinking water.

Dan Schmutz, Chief Environmental Scientist for GPI Southeast, Inc. who has worked with past imagery and is providing QA/QC for the current imagery commented, *“The overall quality of imagery collected from the UCX Digital Mapping camera system—including enhanced resolution, spatial accuracy, and color characteristics— improves our ability to document ecological and hydrological conditions in Tampa Bay Water’s study area.”*

About ACA: Established in 1973, ACA is an industry leader in advanced aerial mapping and photogrammetry. ACA’s Professionally Licensed Staff of Surveyors and Mappers are experienced in integrating the latest proven technologies with precision results. As a 100% digital mapping organization we reach across the USA and the Caribbean providing 3D mapping services for Roads, Rails, Airports, Watersheds, Energy Transmission corridors, Land Development, Mining, and Environmental projects as well as Federal, State, and Local governments. *To learn more contact us at info@aca-net.com or visit our website at www.aca-net.com.*

ACA's Vexcel UCX Digital Mapping Large Format Camera provides superior imagery & cost effective and innovative approaches to any watershed project.

GPI Southeast, Inc. is recognized as a premier provider of water use permitting and compliance services in Florida and offers diversified engineering, surveying, environmental, coatings, and construction services. To learn more, please visit www.gpise.com.

Tampa Bay Water provides wholesale water to the public utility systems of Hillsborough, Pasco and Pinellas counties as well as the cities of New Port Richey, St. Petersburg, and Tampa. To get more information on all Tampa Bay Water activities, please visit www.tampabaywater.org.
